

# “Ante-Chamber” of the “King's Chamber” of the Great Pyramid

All Measurements are estimated

“This is a drawing/sketch of what is commonly called the “Ante-Chamber” of the “King's Chamber” of the Great Pyramid. The Ante-chamber is probably the single most important and most revealing space/room in the entire pyramid structure. The “Ante-Chamber” is in the geographic center of the structure. The “Ante-Chamber” is of pink granite construction and is directly over the “sub-terranean” chamber and pits under the structure. See from our other drawings at [www.SolomonSeries.com](#) and in our book series.
